WHITEPAPER

Version 2

Revolutionizing NFT Membership Rewards: Welcome to BotGains v2.

Welcome to BotGains, the revolutionary new cryptocurrency platform where you can access exclusive features and benefits by purchasing NFTs. Our membership NFTs are limited in supply and are the key to unlocking special rewards within our ecosystem.

Introducing our **BRONZE**, **SILVER**, **and GOLD** membership NFTs, each with its own unique set of benefits.

With a **BRONZE** membership, you'll get:

- · 1 Limited edition NFT image
- · Monthly membership incentives and rewards
- Early access and exclusive discounts on our partners goods and services
- · Access to private BotGains Discord for members only

1,000 Bronze NFTs available at \$250 USDC per NFT

SILVER members will receive:

• 1 Limited edition NFT image
• Monthly membership incentives and rewards
• Early access and exclusive discounts on our partners goods and services
• Early access to new upcoming features
• 50% Lifetime Discount to advanced TradingView indicators and automation
• Access to private BotGains Discord for members only

250 Silver NFTs available at \$1,000 USDC per NFT

GOLD members will enjoy the ultimate experience, with access to:

- 1 Limited edition NFT image
- · Monthly membership incentives and rewards
- Early access and exclusive discounts on our partners goods and services
- · Early access to new upcoming features
- · Access to members only technical analysis channels
- FREE Lifetime access to advanced TradingView indicators
- FREE TradingView indicator group training sessions (via Zoom)
- · Access to private BotGains Discord for members only

50 Gold NFTs available at \$5,000 USDC per NFT

Visit www.BotGains.com to purchase your membership NFTs.

*Plus, ALL tiers (Bronze, Silver, and Gold) will be able to participate in the decision-making process of our project as a governance token holder.

The BotGains team is committed to maintaining a healthy NFT economy and as such, we will be implementing a Bronze NFT governance buyback program, where we will be voting on the buying back of a percentage of the NFT membership tokens in circulation to decrease the overall supply. The purpose of this is to ensure that the value of your NFT membership token increases as the demand for it also increases.

BotGains v2 is deployed as a utility NFT project using USDC (USD Coin) on the BNB Smart Chain (BEP-20).

Joining our community has never been easier. By purchasing one of our NFT membership tokens, you'll be able to connect with like-minded individuals who share a passion for our project. As a member, you'll also have access to a wide range of resources and support to help you make the most of your membership, such as educational resources, community-driven governance, and dedicated customer support.

Don't miss out on this opportunity to be a part of something bigger. Purchase your NFT membership tokens today and start accessing exclusive features and benefits, including monthly rewards, and community-driven governance.

Why purchase a BotGains NFT?

BotGains NFTs come with exclusive perks and rewards for our users. The Future of NFT rewards is here. Don't be left behind – get your BotGains NFT today!

- NFT holders are eligible for monthly membership incentives and rewards
- NFT holders get access to the exclusive BotGains community of like-minded individuals
- BotGains mint will be limited to an initial mint of 1,300 NFTs which will ensure scarcity (Additional rounds of NFT mints may occur in the future subject to consumer demand)
- A portion of the BotGains treasury will be used to purchase Bronze NFTs off the primary/secondary market

How does it work?

You purchase the NFT and hold it in your crypto wallet. The more NFTs you own, the more rewards you will be eligible for!

You simply connect your MetaMask wallet to our easy to use dashboard, and the smart contract will scan your wallet, detect how many and which tier of NFTs you own, and any monthly membership incentives and rewards you have accumulated will be available to you.

No custom tokens that will lose value. No pump and dump tokenomics. Purchase NFTs, earn rewards, and get BotGains.

How do rewards work?

BotGains NFT holders are eligible for future rewards and/or airdrops from the BotGains Treasury by simply holding their NFTs.

The BotGains team may airdrop rewards every 30 to 60 days, or when market conditions allow.

50% of any future profit from the BotGains Treasury will be airdropped to the NFT Holders.

- 36% of these future profits from the Treasury will be airdropped to BRONZE NFT Holders.
- 33% of these future profits from the Treasury will be airdropped to SILVER NFT Holders.
- 31% of these future profits from the Treasury will be airdropped to GOLD NFT Holders.

NFT holders will be paid out according to the percent of the tier they own.

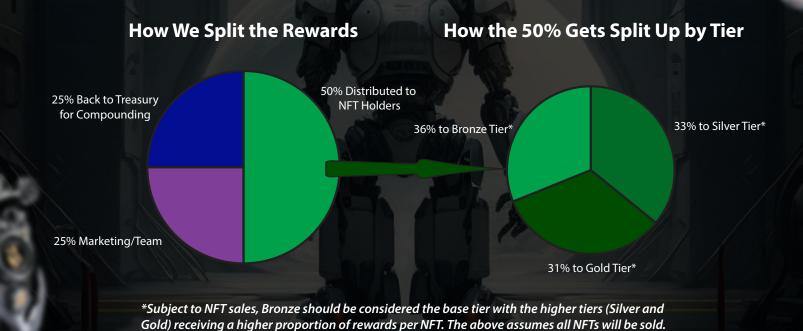

- 25% of any future profits will be deposited back into the Treasury to allow future growth.
- 25% of any future profits may be kept by the team for marketing and management fees.

NFTs can be resold on secondary markets (such as opensea.io) if the user chooses to do so. The team has imposed a 10% royalty fee that will be applied to any NFTs sold on secondary markets.

Existing NFT holders are eligible for up to 75% of the royalty fees:

- 50% will reward long-term NFT holders via airdrop.
- 25% will be deposited back into the Treasury to allow future growth.

The remaining 25% of the royalty fee is left for the team/marketing.

Additional information.

All transactions are made using the USDC stable coin which provides flexibility and peace of mind for BotGains NFT holders.

The BotGains Treasury is managed and overseen by a team of professionals with over 20 years of experience.

There are three tiers of NFTs that the user can mint, each with its unique set of perks.

The BotGains smart contract will be used to verify ownership of your NFTs.

Owning any of our exclusive NFTs will allow the owner to receive monthly membership incentives and rewards including the following:

- ·Exclusive discounts on goods and services
- ·Early access to new features & possible next round NFT minting
- ·Monthly membership incentives and rewards
- ·Advanced trading tools, market analysis, and research reports
- ·NFT is resellable on secondary markets like opensea.io
- ·Participate in the decision-making process of the project as a governance NFT holder
- ·Governance buyback program to decrease overall supply and increase the value of the membership NFT
- ·Access to a wide range of resources and support, such as educational resources, community-driven decision-making, and dedicated support

We utilize a Gnosis-Safe multi-sig wallet to transfer funds to and from the smart contract with a required minimum of 3 team members to approve each transaction.

Why do we use USDC?

This stability is intended to reduce the volatility commonly associated with other cryptocurrencies, making USDC a more suitable option for payments and transactions that require a stable and reliable currency. USDC is issued by Circle, a financial technology company.

- Popular stable coin available on many exchanges
- Every digital dollar of USDC is 100% backed by cash and short-dated U.S. treasuries, so that it's always redeemable 1:1 for U.S. dollars
- Available on Binance's BNB Smart Chain and easily bridged to other popular blockchains.
